Indigo Mobile App – Release Note

Version: 4.3.1

Release Date: May 18, 2025

New Features

1. **Enhanced Booking Experience:**
   We have revamped the flight booking flow to make it faster. Now, you can book your tickets in fewer steps with improved search filters for dates, fares, and destinations.
2. **Flight Status Notifications:**
   Stay informed with real-time flight status notifications, including delays, gate changes, and boarding alerts directly within the app.
3. **Improved User Interface:**
   Enjoy modern design with smoother navigation and accessibility improvements for a seamless experience.
4. **Multi-Language Support:**
   The app now supports Hindi, Tamil, Marathi, Kannada, and Telugu making it easier for more users to navigate and book flights in their preferred language.
5. **Faster Check-in Process:**
   Updated mobile check-in for a smoother and quicker boarding pass generation process.

Bug Fixes and Improvements

1. Fixed crashes during payment processing.
2. Resolved issues with saved passenger profiles not loading correctly.
3. Fixed a glitch causing notifications for upcoming flights.
4. Improved app loading speed and reduced battery consumption.
5. Minor UI fixes and stability enhancements.
6. Better support for UPI and mobile wallets for faster payments.

Known Issues

1. Some users may see duplicate push notifications; this is being addressed.
2. Support for rescheduling multi-city trips will be available in a future release.
